

Capabilities & Service Offerings

Expeditors remains focused on meeting the diverse and changing needs of the healthcare supply chain. We commit to delivering innovative supply chain solutions to the healthcare industry. Customers rely on us for complete logistics solutions, and we understand the trust our customers place in us for supply chain excellence.

We provide solutions that offer local, scalable, and compliant services through good distribution practices to meet the complex product availability expectations around the globe.

Our goal is always to place a customer's materials in the right location that balances cost and service needs while optimizing facility layout and expertise to deliver efficient and effective handling procedures aligned with the appropriate technology solutions.

NETWORK & SERVICES

The Benefits of a Global Network

Our expansive network of facilities encompasses locations built for comprehensive healthcare needs ensuring the security and product integrity of your inventory. As your business expands and your needs in new markets grow, our global network of districts and facilities is there to support with integrated transport and global Customs services.

Healthcare Industry Segments

Our sites provide a range of logistics and warehousing services focused on your high performing healthcare supply chain needs.

1. Order Fulfillment

Our multi-channel order fulfillment process is designed to ensure your medical shipments are:

- Scalable
- Accurate
- Complaint

This distribution service offering documents specific operating procedures to ensure we are staying compliant with your healthcare needs.

2. Value -Added Services

Our warehousing and distribution value-added services include returns, kitting, and other customizable features based on your precise needs. These services ensure that medical products are accurately prepared and compliant with regulations, enhancing their usability and safety. Efficient management helps healthcare providers maintain inventory accuracy and reduce operational costs.

3. Transload & Cross-Dock

Our transload & cross-dock offerings streamline the transfer of medical supplies and equipment, reducing handling times and improving delivery speed. By optimizing transload and cross-dock activities, healthcare providers can ensure the timely availability of critical resources, enhancing patient care and operational efficiency.

4. Returns

Efficient handling of returned medical supplies and equipment ensures quick processing, maintaining stock accuracy and reducing waste. Healthcare providers can enhance operational efficiency, enable expanded customer service options and support sustainability efforts by optimizing returns management.
