

E-BIKES AND MOBILITY

GLOBAL LOGISTICS EXPERTISE FOR THE E-BIKE
AND MOBILITY SECTOR

Enabled by Expeditors' technology, expertise, and global network, our logistics solutions are designed for the mobility sector. Customers require compliant, integrated, and secure transportation to manage parts, finished units, and lithium battery products.

We created our e-bike program specifically for our mobility customers who rely on secure transportation. Our teams take special care and expertise to manage manufacturing demand and aftermarket replenishment.

OUR SOLUTION

We understand the mobility sector's needs and the individual needs of each customer. Our supply chain expertise ensures accurate fulfillment orders, from supplier to the final customer.

E-BIKES AND MOBILITY

ADVANCING YOUR SUPPLY CHAIN

How does this work?

Expeditors' single global platform seamlessly integrates data with material flows, including components for electric bikes and scooters containing lithium battery products. Our operational processes and transportation management system are complemented with a return and recycle solution for safe lithium disposal.

Value-Added Solutions

Global operating procedures for Dangerous Goods handling, aligned to industry standards

Specialized training and expertise in battery handling and transportation

Global compliance programs

Approved service provider agreements and monitoring for return and recycle flows

Global and regional capacity for finished units and safe handling of products

Mobility Expertise and Solution Design

Component parts, packaging management, and finished units

Return and recycle program, including e-waste disposal

Specialized and approved service providers

End-to-end integration of information flow using part or shipment-level information

Customer Enhancement

Expeditors EXP.O NOW system provides global tracking using part-level and VIN-level information

Dedicated and shared user networks

Final Mile delivery with Expeditors road freight network

Integrated customs and compliance program management

PROGRAM OPPORTUNITIES

Expeditors' automotive & mobility solutions are designed to meet the needs of the e-bike and e-scooter expansion with solutions catered to components and finished unit logistics. We maintain a secure supply chain by managing equipment in a compliant manner, backed by our expertise and operational knowledge.

Global reach and local expertise • End-to-end integration of information flow using part or shipment level information • Compliance and consistency
