

EXP.ONOW[®]

Analytics

Turn Logistics Data Into Clearer Business Decisions

Understand shipment performance across your network

Identify trends, exceptions, and cost opportunities

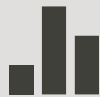

Streamline operational planning and execute supply chain improvements

MODERN ANALYTICS, BUILT INTO EXPO.NOW

Interactive Power BI dashboards embedded in EXPO.NOW

Powered by the same trusted logistics data you rely on

Data refreshed multiple times per day

No separate report platform or manual reporting required

SIX DASHBORDS

ONE CONNECTED VIEW OF YOUR SUPPLY CHAIN

TRANSPORTATION

- **Transit Time Analysis:** Understand transit performance trends
- **Transportation Volume Analysis:** Monitor shipment volumes and network trends

CUSTOMS BROKERAGE

- **Brokerage Timing:** Identify clearance delays and improve predictability
- **Duty Recovery Tracker:** Track eligible duty recovery opportunities and savings

ORDER MANAGEMENT

- **OM Network View:** Visualize order and shipment flows across your supply chain
- **OM Business Review:** Review operational performance, trends, and utilization

QUESTIONS ANALYTICS CAN HELP ANSWER

- Where are transit times changing across lanes or regions?
- What shipment volume trends may affect planning?
- Where are customs delays or exceptions occurring most often?
