EXPEDITORS TRANSCON

Enhanced High Value Solution

Transporting high value cargo is not a simple task. Damage is detrimental, visibility is required, compliance is mandatory, and risk of theft is escalated. High value commodities are critical components in manufacturing and service sectors, driving rapid innovation and market demand. The truckload industry, particularly smaller fleet operators, faces significant vulnerabilities due to limited security resources and visibility, which only increases the risk of cargo loss.

KEY ELEMENTS

Dedicated Security Representative	Experienced Drivers	High Value Protocols (Driver & Expeditors)	Dedicated Assets	Layered Security with 24/7 Management

AN ENHANCED HIGH VALUE SOLUTION

Expeditors' enhanced high value truckload program incorporates a layered approach to ensure driver and cargo safety and security. This program focuses on managing targeted commodities with an increased threat of theft and damage. This solutions includes:

DEDICATED, SCHEDULED CAPACITY

- Experienced, exclusive driver capacity
- Team drivers on lanes with longer miles-increases speed to market and reduce touch points
- Day-specific ground transit times
- Pre-planned route timing
- Integrated dedicated cartage fleets for first and final mile
- Drop trailer equipment available

ACCESS TO OUR STRONG GROUND NETWORK

- Direct asset capacity
- Global footprint of security yards and facilities
- Integrated premium white glove services at pickup or delivery
- In-house customs brokerage
- Door-to-door visibility
